Mayur Jathar

Summary

Junior Software Engineer with a strong foundation in web development and system management. Demonstrates proficiency in JavaScript, HTML, SQL, and Git, gained through hands-on experience and academic training in Computer Engineering. Skilled in collaborating within a team environment to resolve technical issues and support software maintenance. Brings practical experience from previous roles to contribute effectively in-office at OneWell Health Care.

EDUCATION

Siddhant College of Engineering

Dec 2021 - Mar 2025

Bachelor of Engineering, Computer Engineering

• GPA: 8.48

Late Sahebrao Phadatare Sec. & higher Sec. School

Jun 2020 - Jun 2021

Degree in 12th • **GPA**: 89.60%

Saraswati Vidyalaya Visapur

Jun 2018 - Jun 2019

Degree in 10th • **GPA:** 86.50%

EXPERIENCE

Omvsab IT solution

Jun 2024 - Feb 2025

Jr. Software Developer

Pune

PROJECTS / OPEN-SOURCE

Travel and Tourism Management System

- Developed a system using Java, HTML, CSS, and JavaScript for managing travel services.
- Implemented booking and reservation features for flights, hotels, and tours.
- Created user authentication, profiles, and secure payment integration.
- Managed a database for users, bookings, and travel packages.
- Added advanced search, filtering, and responsive design for multiple devices.
- Integrated customer support and feedback features.
- Utilized Git for version control and team collaboration.

Istato: (Real Estate Management System)

- Developed a web application using Java, HTML, CSS, and JavaScript, SpringBoot for managing real estate plots.
- Integrated Google Maps.
- Enabled users to search, view, and book plots, while admins manage listings and user data.
- Implemented features for providing secure authentication.
- Integrated a database for managing plot listings, user data, and transactions efficiently.
- Included secure payment handling and customer feedback features.
- Utilized Git for version control and effective team collaboration.

Data Steneography

- Developed a system using Java (NetBeans) for both frontend and backend to encrypt and decrypt data in images and voice files.
- Use java for Frontend and Backend.
- Integrated functionality to securely handle and transmit data via email.
- Ensured data confidentiality and integrity through robust encryption algorithms.
- Designed a user-friendly interface for easy interaction with the encryption and decryption process.

SKILLS

- Programming Languages: Java, C++, HTML, CSS, JavaScript
- Libraries/Frameworks: SpringBoot
- Tools/Platforms: Git. GitHub
- Databases: MySQL, MongoDB
- Development Areas: Web Software Development, Backend Development, Systems Management

CERTIFICATIONS

• Full Stack Course: Anudip Foundation.
